SOHAIL AHMAD

Computer Science Student | Computer Networking & Network Engineering | Web Development

Location: Abbottabad, Pakistan **Phone:** +92 3350153592 **Email:** sohaila65654@gmail.com

LinkedIn: https://www.linkedin.com/in/sohail-ahmad-109145360 **GitHub:** https://github.com/sohailahmadmarwat

Portfolio: https://my-portfolio-two-eosin-22.vercel.app/ **Fiverr:** https://www.fiverr.com/sidra675

SUMMARY

- Computer Science student at **COMSATS University Islamabad (Abbottabad Campus)** (BSCS, 2024–Present).
- **Networking:** approximately 3 years of hands-on learning and project work in computer networking and network security fundamentals, including routing and switching, IP addressing and subnetting, Cisco Packet Tracer, network configuration and troubleshooting.
- **Web Development:** approximately 2 years of learning and project work building web applications with React.js, JavaScript, HTML5, Tailwind CSS, Firebase and Git/GitHub.
- **Work & Teaching:** completed Fiverr client orders; worked as a Senior Call Center Agent; 4+ years teaching Grades 1–12, plus informal peer mentoring in computer science and networking.
- **Learning:** AI fundamentals and AI-based networking ideas.

TECHNICAL SKILLS

Computer Networking: Computer Networks Fundamentals, Routing and Switching, IP Addressing and Subnetting, TCP/IP, DNS, DHCP, Network Configuration and Troubleshooting, Cisco Packet Tracer, Wireshark / Network Traffic Analysis

Network Security (Fundamentals): Network Security Concepts, Network Segmentation, Firewalls and Access Control, Basic Cybersecurity

Web Development: React.js, JavaScript, HTML5, Tailwind CSS, Responsive Web Design, Vite, Firebase Authentication, Cloud Firestore

Programming & Software Development: Java, JavaScript, Dart, Flutter, Data Structures and Algorithms, Object-Oriented Programming, Java Swing, Technical Documentation

Tools: Git, GitHub, Visual Studio Code, Cisco Packet Tracer, Firebase Console

Emerging Technologies: AI Fundamentals (learning); AI-based networking, AI-assisted network monitoring and traffic analysis (exploring)

EXPERIENCE

Freelance Web Development, Networking Projects & Technical Services | Fiverr [2 years]

- Completed Fiverr client orders by delivering work according to agreed project requirements.
- Worked on web development, networking-related and other technical projects based on client needs.
- Communicated with clients to understand requirements, clarify deliverables and handle revisions.

Senior Call Center Agent | [Employer to confirm] [1 year]

- Communicated professionally with customers and resolved queries and service-related issues.
- Followed established procedures and communication standards; applied problem-solving and interpersonal skills.

Teacher / Academic Instructor | Grades 1–12 [4+ years]

- Taught students from Grade 1 to Grade 12, explaining concepts in clear language suited to each learning level.
- Developed communication, patience and organization skills while helping students solve academic problems.

SELECTED PROJECTS

Timber Inventory Control System

Technologies Used: React.js, JavaScript, Tailwind CSS, Vite, Firebase Authentication, Cloud Firestore

- Developed a React-based timber inventory web application using Tailwind CSS and Vite to manage timber stock records.
- Integrated Firebase Authentication and Cloud Firestore for user authentication and data storage.
- Managed inventory fields including timber ID, type, zone, weight, status, height, quantity, price and cutting date.

Multi-Queue Router Simulator

Technologies Used: Java, Java Swing, Data Structures and Algorithms

- Built a Java Swing interface for a multi-queue router simulation to demonstrate networking and data structure concepts.
- Represented packets with packet ID, source IP, destination IP and priority; implemented priority-based handling (lower value = higher priority).

Networking Simulation using Cisco Packet Tracer

Technologies Used: Cisco Packet Tracer

- Practiced network design, configuration and connectivity testing through Cisco Packet Tracer simulations, connecting networking theory with simulated environments.

Skill-Swap Application

Technologies Used: Flutter, Dart

- Developed a mobile application focused on skill sharing between users, applying mobile application development concepts.

TECHNICAL MENTORING & PEER LEARNING

- Helped peers understand computer science concepts, explained programming fundamentals and shared networking fundamentals.
- Communicated technical ideas and project concepts in a clear, accessible way.

EDUCATION

BS Computer Science | COMSATS University, Islamabad, Abbottabad Campus, Pakistan *2024 – Present*
CGPA: 3.70/4.00

CERTIFICATIONS & ACADEMIC RECOGNITION

- **Certification:**
  Cisco Networking Academy – Course Completion Certificate
- **Academic Recognition:**
  COMSATS Campus Honor Roll Certificate for a 3.89/4.00 GPA in the 5th semester
